The human body is a symphony of sounds. Every organ, every bone, every tissue, every cell has its own resonant frequency, its own sound.

As mankind pushes the boundaries of science and technology, we are often exposed to things that are harmful in ways we don't understand or are unable to address using traditional approaches such as pathogens that have been genetically modified/engineered/weaponized (WPNP) including fungi, viruses, bacteria, mycoplasmas, etc. They can be coated with heavy metals and carry information or nano-technology (SIT) into the body that causes toxicity, changes to DNA, etc.

Because these organisms and technologies are extremely advanced, the technique we use to clear them needs to match. This is where the Coherent Restore comes in.

How does it work?

ATB Coherent Restore is a way to give the body information and instructions in order to recognize and eliminate non-organic or engineered material. It consists of turning on the body's ability to see light that has been bent for masking purposes in an attempt to make these pathogens invisible to the body.

DAYAH](https://yadayahcounseling.wixsite.com/yadayah)

Once the body can see these organisms we use the information from the biofeedback scan and muscle testing to confirm and further evaluate the kind of WPNP in the body and the nano-technology that they might have carried in. To remove both the WPNP and the SIT we use a combination of laser, ATB touch points and verbal instructions through prayer.

After the body has successfully eliminated those things we check to see if there are any organs and glands that need to have their communication reset with the hypothalamus. The hypothalamus is the master gland of the body and is often targeted by WPNP and SIT which disrupts its ability to regulate hormonal responses throughout the body. The reconnection is also accomplished through a series of specific acupressure points, laser and commands. We check to make sure that each of these organs and glands are also properly positioned in the body. If there is a misalignment,

we muscle test to see what kind of sound (via tuning forks) will best minister to those body parts. Lastly, we pass a magnetic field around the body with our magnetic sticks or TechX device. This further helps wipe out any software being used by technology in the body.

What can I expect from the ATB Coherent restore session?

What can I expect from a Coherent Restore? Clients report a wide range of reactions to having a restore done - from being energized to fatigued, feeling odd sensations in the body to feeling nothing at all. What you notice will be related to the severity of the WPNP/SIT and how sensitive you are to your own body. Most people will notice that they are a bit tired for the day and may experience a mild "die off" or detox reaction. It can take up to 2 weeks for the body to fully respond to the restore.

The ATB Coherent Restore can be done in our office or remotely using a DNA sample. If you have the remote restore we will inform you of the general date and time your restore will be done so you can plan your day accordingly. You do not need to be available but you might want to be aware of what is happening in the event that you have some reactions. After the restore is done, the notes will be recorded to your chart and you can read the instructions on how to understand the clinical notes.

This process has evolved over time and represents our most current information, but The Creator is always teaching Dr Alphonzo and leading him into more effective ways of helping the body restore so we are anticipating that as we continue to do these restores and get feedback from our clients, our protocols will continue to improve.

ATB COHERENT RESTORE

It is important to educate yourself with knowledge on how nanotech works as well as SIT (Satanic intelligence technology) so that you will understand the importance of doing the ATB Coherent restore session

I have a course available on Telegram.

We will be looking at the following topics

1. Nanotechnology
2. Nanotech and the human body
3. AI, grids, portals, ley lines
4. Weaponized pathogens and witchcraft
5. Activation of nanotech.
6. The truth about a virus.
7. SIT's (Satanic intelligence tech)
8. Music and frequency
9. Detox methods

There is a **coating** "lipids" around these nano particles to **disguise** them so that the immune system would not see it as invaders. The immune system takes up these particles and makes it part of your own immune system. At a certain stage it can **change and target** certain cells in your own body.

Thus, it **hijacks** the normal function of the immune system and certain organs. They want to influence behaviour and disease.

They are possibly turning on disease to generate money for Pharmacia.

Some experts have warned that we do not yet know how these particles of nanotech will act in the environment or what chemical reactions they will trigger upon meeting other particles.

Nano- "medicine" camouflage these nano-particles to hide it from the immune system.

Nanotech goes and **binds on certain receptors of cells**, so that it can **target certain cells**. Nanomaterials have unique optical, electrical and/or magnetic properties at the nanoscale, and these can be used in the **fields of electronics** and medicine, amongst other scenarios

AGENDA:

AI – Is mixing human with nanotechnology.

The enemy wants access to the blood because life is in the blood.

- They want access to the DNA to mix with it and they need your consent to do so.
- Nanotechnology combined with AI, when coming into contact with the body will scan the body for **ANY weakness** and will attack the body, because it is designed to do just that. **It was created for that.**

This is why **no remedy or natural remedy** will be able to destroy it. They are a step ahead of you. Some nanotech can hide in the body for 10 – 20 years.

It can be activated by EMF, trauma, and illness.

COST:

ATB Coherent restore session
R1000 or USD100

Nanotechnology course
R300 or USD35

ATB Coherent identification session
R500 or USD45

Geographical stressors session

How does Muscle testing work

Muscle testing is a reliable diagnostic tool that is often used in alternative medicine.

It is often used where the practitioner applies pressure to the arm of the patient for muscle tests. This applied technique tests for muscle strength and muscle weakness and imbalances around illness, diseases, belief issues, allergies and various health decisions. When the body is in balance and happy your muscles feel strong. When there is fear, pain, resistance, poor mental health, self-doubt or worry the body reacts differently and your muscles feel weak. When you agree to something subconsciously your muscle strength is higher than when you **disagree**. When your subconscious mind disagrees it will make your body and your muscles feel weak.

Muscle testing is like the bridge between your **conscious and your subconscious mind**.

One of the issues that most people have when trying to understand why they do what they do is understanding that there is a massive difference between conscious and subconscious **actions and beliefs**.

Muscle testing helps practitioners to find **subconscious** issues and blocks.

Also note that with muscle testing we are collecting biofeedback from the body. The body can not lie. With the soul we can lie but when the body is presented with a statement it can only respond to positivity

It can be useful to diagnose where **trapped energies (trauma frequencies)** are and why they are there. It can also be used to give a person insights into how to resolve the issue and keep it resolved.

Ways to muscle test

1. Sway test
2. Arm wrist test
3. Finger thumb test
4. Proxy testing

Muscle testing is designed to bring subconscious information into conscious awareness. Muscle testing can give us insight into the inner workings of our subconscious.

Like I mentioned previously, the cells in the body build up a memory, so does the sub-conscious mind. The sub-conscious mind is the hard drive where everything (memories, beliefs, values) are stored.

The sub-conscious mind also controls our muscle movement. There is a direct link between the sub-conscious mind and the muscles of the body.

In order to find out what your subconscious mind and body are congruent with, we ask very targeted questions to get clues to what emotional aspects might need to be addressed.

In some cases, I will teach you how to use self muscle-testing (testing on your own muscles) to get these answers. In other cases, I will be using "proxy" muscle testing for you.

Proxy muscle testing

Proxy testing is muscle testing that is done on myself, for you. Our bodies have a built-in capability to connect to or "call" someone else (**Quantum entanglement**), like a cell phone. When we do this, we create an energetic connection with them.

Once you're connected, you can get answers about what is going on with this other person's body, because you're picking up their energetic flow or signal.

Proxy work can also be used to identify:

- Trauma frequencies
- Prenatal trauma frequencies
- Absorbed trauma frequencies
- Supplementation, minerals and essential oils needed by the body
- Bloodline trauma frequencies

Again, since you are connected to their energy field (and energy knows no space and time – just like when you're thinking of someone and they call you!), it can be done regardless of distance.

You can test these mentioned above because all is disturbing the electromagnetic field of the body

this is done through prayer. We will pray beforehand. We will put up the filter of the Blood of Yeshua and pray that there will be no interference, projection or resonance and that the your sub-conscious mind and body will work with the Holy Spirit (Ruach) in the particular session.

I will use a chart with the different trauma frequencies to identify which TF is stuck in your body or connected to a specific illness. We will then pray to release the TF and test to see if it is released.

Please refer to [Dr MK Strydom's book](#) as well where she states that all illnesses are linked to specific thought patterns.

Muscle testing can never be used for

- Predicting the future
- Diagnose an illness

Frequently asked questions:

Is it divination?

Divination: seeking knowledge of the future or the unknown by supernatural means.

Muscle testing can **NEVER** be used to predict the future and uses the bio-feedback from the body (scientifically proven method). **The source of the information is not unknown.**

Is it witchcraft?

Witchcraft is communication with demons to access the spirit realm for information. Muscle testing is putting pressure on a muscle to measure a physical change in the body when exposed to truth or untruth. yet again, it is a scientific proven method.

X-rays, MRI, Millimeter Wave scanner at Airports are all examples of testing without physical contact.

Final word:

Everything has been created by God for His purpose. Nothing is evil in itself except when used with an evil intention. God created the body, He created science and physics. It all belongs to Him first.

Muscle testing must always be used with the guidelines of God's Word.

What is a photo session?

Kineology is a form of therapy that uses muscle monitoring (bio-feedback) to look at imbalances that may be causing symptoms in the body.

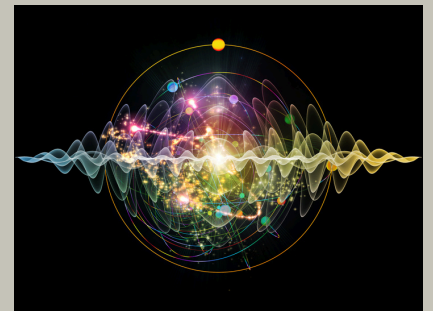

How does it work

Kneology aims to detect imbalances and correct them. These imbalances are related to stress, trauma, nutrition or minor injuries.

The muscle testing I use are applied to a muscle and feedback is then received from the body. It is a very effective way that can identify blockages and disturbances in the Bio-electrical system of your body.

Your thoughts and emoticons affect the heart's energy too (we read if this in the Bible that the heart is the seat of the emotions). Your electromagnetic energy (comes from the heart) is a carrier of all information ([please refer to my articles of frequency on my website](#)).

To understand this better I would suggest that you go to the [website of the Heart Math institute](#) as well.

Light is made up of photons, which are like tiny packets of energy. Capturing that light energy is what creates a photo or an image on your computer / phone screen when you video call someone.

Just like photons, [electromagnetic energy](#) also gets captured in a photo, a video call, an image displayed on a screen of your phone or your computer. This electromagnetic energy can be transferred through a photo, cellphone screen or a PC screen at the speed of light.

It works on the same principle, where the phone or your PC ,is a conduit (proxy) that can transfer sound energy.

The Heart Math institute has done numerous studies on how we are connected via these Bio Communication systems of our bodies. Information can exchange on a subconscious level without us even being consciously aware of this

What is a photo session?

Remember: Science belongs to God. He created science, so there is nothing new about what has been discovered.

To use muscle testing is a basic tool to read the bio-feedback of the body.

The body has a record build into it that records everything from conception up until the age you are currently.

All information passed on from previous generations are encoded in your parents genes (DNA) that was passed on to you. Therefore the body is a carrier of that information as well as all trauma, thoughts, emotions, feelings, events and so forth that has been build into your body in the form of body memory and cell memory. When it comes to the brain, everything is recorded in the subconscious mind and your muscles are also controlled by the subconscious mind, therefore they are linked.

This method is very accurate to pinpoint imbalances in the body connected to trauma, thought patterns, inner vows, trauma frequencies (like unloved, unworthy, rejected, shame, fear just to name a few).

When it comes to a symptom in the body like chest pain, migraines, overall pain (to name a few) we know that these emotions will go and sit in a weak spot like the symptoms mentioned. This is why we can then test and see what emotional frequencies are related to that imbalance (or disease). All illness are related to trauma, thought patterns, emotions or bloodline.

I urge you again to go and read through these documents on my website and let Abba's Spirit guide you.

Form more information you are welcome to contact me.
